

The Rhythmic Sky 2019

On **Wednesdays** 20 February – 27 March 2019
at Oxford Area School Observatory, Bay Road, Oxford.

This 6 week two-hour course runs every Wednesday evening from 7 – 9 pm.

We will run sky tours and telescope viewing when weather permits.
Start time is precise but the course may run out a bit after 9 especially with clear skies.

Tutor: Chloe Firkin

This course is an ideal start when you have an interest in the night sky.
It provides in-depth explanation about how celestial objects move in our sky,
and it will change the way you gaze at the heavens above.

Covering:

- Shape of the Earth, - Rotating Earth
- Orbiting Earth, - Moon,
- Planets, - Milky Way
- and what else moves in the sky.

Drinks and nibbles provided during tea break.

Cost \$60 for 6 weeks

(Enrolled or home-schooled students half price).

How to Enrol

send an email to ngawheturesources@gmail.com

Or use the **Contact Us** form on this website
with "RS2019" in the subject line.

Please specify the full name(s) of participant(s) and
use the email address where we can contact you throughout the course.

You will receive payment instructions.
Enrolment will be confirmed when payment has been processed.
